(346)-812-3285 | ausnguybusiness@gmail.com | Houston, TX | [linkedin.com/in/austin-nguyen-business](https://www.linkedin.com/in/austin-nguyen-business) | [ausnguy.github.io/austin-portfolio](https://ausnguy.github.io/austin-portfolio)

## EDUCATION

University of Houston, C. T. Bauer College of Business

May 2027

B.B.A: Management Information Systems

GPA: 3.95 | Dean's List: Fall 2023 – Fall 2026

Relevant coursework: Data Programming, Database Management Systems, Systems Analysis & Design, Business Statistics

Awards: Ted Bauer Scholarship | Lockheed Martin Vocational Scholarship | George Foundation Scholarship

## SKILLS

Languages: SQL, Python (Pandas, NumPy, PyTorch, Matplotlib), Java, R

Data Visualization & Analytics: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), DAX, KPI Reporting

Data Processing & ETL: Power Query, SharePoint Data Refreshes, Data Cleaning, Data Transformation, Data Validation

Tools & Concepts: Git/GitHub, Jupyter Notebook, Agile, SLURM/HPC

## EXPERIENCE

Hewlett Packard Enterprise (HPE)

May 2026 – Present

Data Analyst Intern – Compensation & Equity

- Built and owned an automated BI pipeline using Power Query, SharePoint, Power BI, and DAX to consolidate **8 Workday datasets**, replacing manual reporting and saving **7 Compensation Managers 10–12 hours per reporting cycle**.
- Enabled faster compensation decision-making by creating a single source of truth in Power BI for pay guidelines, salary ranges, equity budgets, and compensation calculations across **66,000+ employee records**.
- Improved data reliability and model maintainability through Workday data normalization, key-based Power Query joins, duplicate detection, standardized KPI logic, and GitHub version control for model changes and documentation.

USI Insurance Services

June 2025 – July 2025

Data Analytics Intern – Employee Benefits

- Analyzed **\$1M+ in healthcare claims** data using Excel, performing cost trend, utilization, and benchmarking analysis to identify patterns and support renewal strategies for **10+ employer clients**.
- Standardized and validated **5,000+ row healthcare datasets** through data cleaning, field normalization, reconciliation, and QA checks, improving consistency for downstream analysis and annual client renewals.

ToolAndMore

November 2023 – April 2024

Owner & Operator

- Generated **\$75K+** revenue in the first year by launching and scaling an Amazon e-commerce business focused on power tools, hardware, and niche high-margin products.
- Maintained **30%+ profit margins** by conducting ROI, profitability, sourcing, and pricing analysis to evaluate product economics, guide purchasing decisions, and optimize inventory restocking.

## ACADEMIC PROJECTS

MNIST Handwritten Digit Classifier

Jan 2026 – Present

- Built and trained a deep neural network in PyTorch (Python) to classify handwritten digits, achieving **~96–98% test accuracy on 10,000 test images** across **70,000 total samples**.
- Built a reproducible preprocessing and inference pipeline for **28×28 grayscale images**, standardizing image inputs and prediction workflows to support consistent model evaluation and repeatable testing across new samples.

BNY Mellon Project: AI Emissions & Efficiency Modeling

May 2025

AI Infrastructure Research

- Reduced modeled AI energy consumption by **~70%** by designing a distributed inference strategy that routed simpler requests to lightweight models, lowering compute demand and improving scalability.
- Cut modeled inference latency by **~55% (611 ms to 276 ms)** by evaluating model-routing and caching strategies that reduced unnecessary high-compute inference and improved AI workload scalability.
